

maps Platform

Application Platform and Development Service
for Modern Business Cycle

Cloud-Native · Enterprise Grade · DevOps Ready · Scalable · Secure

What is maps Platform?

maps is a comprehensive cloud-native application platform built for modern enterprises. It provides a unified, multi-tenant infrastructure layer that accelerates development, enforces security, and enables teams to focus on building business value rather than managing infrastructure complexity.

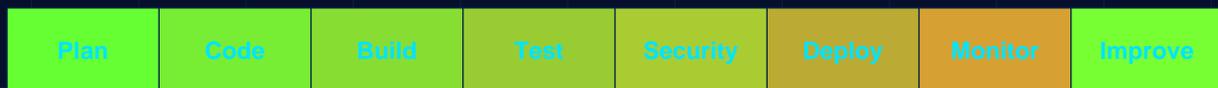

Flexibility	Velocity	Resilience
Adapt to any workload or cloud	10x faster application delivery	99.9% uptime SLA guaranteed
Agility	Delivery	Infrastructure
Self-service developer portal	Automated CI/CD pipelines	IaC + GitOps management

Platform Architecture

maps Platform is organized in four distinct layers, providing clear separation of concerns and enabling independent scaling, management, and governance at each tier.

LAYER 1	Customer Specific Applications	Business applications built by tenant teams
LAYER 2	Common & Shared Services	API gateway, auth, monitoring, security, CI/CD
LAYER 3	Multi-Tenant Platform	Kubernetes, networking, storage, auto-scaling
LAYER 4	DevOps & Operations Teams	Platform engineering, SRE, incident response

DevOps Pipeline

Platform Benefits

FLEXIBILITY	QUICKNESS	SAFETY
<ul style="list-style-type: none"> Multi-cloud & hybrid Microservices architecture API-first design Container-native runtime Custom domain support 	<ul style="list-style-type: none"> CI/CD automation 10x faster deployment Self-service portal Pre-built templates Instant provisioning 	<ul style="list-style-type: none"> Zero-trust security SOC2 / ISO 27001 Automated SAST/DAST Secrets management Audit logging

Platform Comparison

Capability	maps Multi-Tenant Platform	Traditional In-House Cloud
Cost	+ Shared - Lower TCO	- Siloed - Higher TCO
Provisioning	+ Minutes (automated)	- Weeks (manual)
DevOps	+ Centralized team	- Duplicated per team
Security	+ Platform-level, automated	- Team responsibility
Scalability	+ Auto-scaling built-in	- Manual configuration
Maintenance	+ Platform managed	- Team managed
Upgrades	+ Rolling, automated	- Manual, risky
Compliance	+ Centralized audit trail	- Distributed, complex

Customer Success Stories

Financial Services

Bank Guarantee Loan System

Digitized the entire bank guarantee workflow, reducing processing time from days to hours. Built on maps Platform with automated compliance checks, audit trails, and secure document management.

Commerce & Retail

Merchant Support System

Unified merchant onboarding, support ticketing, and analytics on a single cloud-native platform. Achieved 40% faster merchant activation and 60% reduction in support resolution time.

Government Services

Resident Portal Platform

Delivered a citizen-facing portal with 99.9% availability, real-time application tracking, and integration with 12 government agencies via maps shared API gateway.

Build and operate business applications faster with maps Platform
